Enhanced Features

Add Desktop Shortcut for Main Applications

The GC-PowerPlatform installer now provides users with a choice of installing a desktop shortcut during installation.

On Line Help

GraphiCode is in the process of putting all help information onto our website to allow faster and more accurate updating, easier access and reduced product size. Function information is available to all users but additional information is only available to customers with a valid Annual Support Plan. There will be a period of overlap where the Help files are still shipped with the product but all future Help information will be placed on the website.

Items Fixed since v16.3.2

This list is customer reported issues fixed for this release.

#4231 SM import is now correctly interpreting the 'R' as radius in all cases.

#4199 Added option for a desktop shortcut to be created during installation.

#4191 Updated the draw engine to display single segment polygon traces on screen to indicate their presence. These incorrect segments are displayed with indicators showing problem polygons.
